| Subject:   | Quarter 2 Key Project and Performance Report                  |
| Report to: | Policy & Resources Committee – 30 <sup>th</sup> November 2021 |
| Report by: | Senior Performance & Data Protection Officer                  |

### SUBJECT MATTER

The following presents an update on performance for the second quarter of 2021/22 (Jul – Sep) where progress is assessed against Targets which are set at the start of the financial year.

The report also provides an update on the position of key projects that are linked to the corporate priorities from 'The Plan 2020-2025'. A summary of progress for the suite of key projects and individual highlight reports for each of these key projects are presented in Appendix 1 of this report.

The performance measures, see Appendix 2, give a comprehensive overview of how the authority as a whole is performing and cover most Council functions.

### RECOMMENDATION

That Committee agree:

• All measures to be monitored during the next quarter.

• All key projects will continue to be monitored over the next quarter with the aim of maintaining a green status and where possible attaining a green status for those key projects which are currently amber.

### 1. Introduction

This report is written to enable consideration of all performance measures and key projects within the report and to allow the continual to monitoring of these throughout the year, reporting quarterly to Executive Leadership Team (ELT) / Management Team (MT). Performance measures will be presented to the relevant service Committees on a quarterly basis with the complete suite going to Policy & Resources Committee. The suite of ten Key Projects will be reported to Policy & Resources Committee quarterly.

## 2. Work to Date

A review of all projects was conducted at the end of the 2020/21 financial year and a new list of key projects was established and included in the Council's Annual Action Plan 2021/22, this was approved by Policy & Resources Committee on 27<sup>th</sup> July 2021.

The project highlight reports that follow provide a summary of the project, milestones and achievements, alongside open issues, mitigation and a financial summary.

Each report has a current status, which can be green, amber or red. Out of the ten reports, seven have a current green status defined as no problems or minor issues and three have an amber status defined as having problems which have been identified but with a contingency plan in place.

Key Project Current Status

Total

| Green – no problems or minor issues                       | 7 |
|---|---|
| Amber – problems identified but contingency plan in place | 3 |
| Red – out of tolerance serious problems                   | 0 |

KP03 - Middlegate Estate: The potential lack of funding for redevelopment remains an issue. Current work will identify the required funding which will allow informed discussions with DLUHC and Homes England. If only partial funding is available we will need to redefine this project. Timescales for phase 2 master planning and viability continue to be elongated, these are being monitored although consultant availability has had some impact on this to date.

KP08 - Improving the Market Place: Delays due to availability of materials and manufacturing have been encountered leading to a delay with phase 1 moves to January 2022.

There may be significant issues with the fabric of 37-39 Market Place due to its age and structure, therefore in-depth invasive surveys will be carried out following final agreement of the Heads of Terms. Full access to building to be achieved as soon as possible.

KP11 - The Conge: The site viability remains an issue, however the procurement of a strategic partner is well underway. Discussion over resolution of leases are ongoing with current leaseholders.

## 3. Performance Measures

Performance measures cover the full range of services delivered by the Council. The details in this summary report provide quantitative information about the performance of these services and provide useful trend data. A traffic light status easily identifies if improvement is required.

There are some areas across the Council where performance is below the target level set (RAG rating) or where no target has been set performance is moving in the wrong directions (Direction of Travel). These measures are highlighted in the appropriate service committee section of the report.

In total there are 42 targeted and 8 monitored measures reported in the second quarter performance report. The monitored measures are reported for contextual information, this data is important information for the Council as the actions of the Council may make improvements however there is not sufficient control over the outcome to set a target.

A breakdown of the 42 targeted measures is shown below.

Performance Measures against Targets

Totals

| Green – Performance has met or exceeded target           | 26 |
|--|----|
| Amber – Performance is below target but within tolerance | 7  |
| Red – Performance is below target and tolerance          | 9  |

There are nine measures that are within the Red status which are not achieving the target and are below the tolerance level set, an explanation of the performance in these areas is provided below each measure in the report.

It is important to note that throughout the second quarter the effects of the COVID pandemic continue to have an adverse effect on some areas of the Council's performance.

Out of the nine measures within the Red status, three have been disproportionately affected by COVID which has caused them to slip into the Red Status. The three measures affected are indicated by an \* below:

The red status measures are:

- PR02: Average time to assess Housing Benefit Change in Circumstances (Quarterly Cumulative) \*
- PR06: Contact centre telephone calls: Percentage of Contact Centre calls answered as a % of all calls offered (Quarterly Cumulative)
- PR07 Contact centre telephone calls: Average wait time by customers contacting the Contact Centre (Quarterly Cumulative)
- PR10: The number of working days lost due to sickness absence per FTE. (Quarterly Cumulative)
- ED07: Building Control: The percentage of building regulation applications where a decision notice is issued within the eight week statutory period \*
- ED08: Percentage of Land Charges search returns sent within 10 working days. (Quarterly Cumulative) \*
- EN01(b): Food Hygiene Number of food premises inspected (Quarterly)

- HN02(b) Social housing new applicants awaiting assessment (Snapshot at last day of quarter)
- HN04 Average cost of a Void repair

### 4. Financial Implications

# Summary of the whole project

### The Great Yarmouth Energy Park

The ambition is to secure inward investment and regenerate the project area to generate economic growth and improve the environment through redevelopment. The strategy is a reflection of the demand on the port area, with targeted redevelopment and re-use of sites by the private and public sector. Part funding for the project has been put in place by Norfolk County Council from the Norfolk Infrastructure Fund, this is recorded by the NIF Annual report dated 3 March 2014 where it is decided to support the project to £2.75m. The remaining funding, £250,000, will come from Great Yarmouth Borough Council from its capital reserves.

### **Business Incubation units Phase 1**

Part of Town Deal bid, creation of business incubator units within the north east quadrant of GYEP which is within the ownership of Great Yarmouth Borough Council, unlocking and enabling further inward investment by the energy sector and providing a low-risk local base for energy sector start-ups, relocations and growing businesses.

| Key Project achievements             | Milestones  | Target Date/Outcome |
|--------------------------------------|---|---------------------|
| Business Incubation unit's (Phase 1) | Construction to commence  | late 2022           |
|                                      | Business Case Stage 2 Town Deal submission  | March 2022          |

Football Foundation undertook fieldwork surveys on 16th June. Further electrical surveys took place the following week. Feedback received by project team.

Appointed Consultant has started to draft the FA application for 3G pitch. A draft site management options has been drafted and ongoing dialogue with GYFC re Football Stadium Improvement fund priorities/options. Plans for 3G pitch being produced and pitch size options being explored.

Contract awarded to GY Preservation Trust for improvements to the Ticket Office, works to be completed mid-October 2021.

Members Working Group meeting took place in July, positive feedback to site plans and progress.

Regular meetings with the FA taking place to ensure delivery of the 3G project.

Application to Safer Streets Fund, in partnership with Norfolk Constabulary and GYTCP, was successful. PMO working with Property to establish Project Plan/Timeframe leading on CCTV installation on site.

Communications Engagement event held in August 2021; positive feedback received from those in attendance. Final evaluation report being produced by Comms Team and will be shared with OWG and Members. Press release issued in line with the community engagement event and two further press releases to be issued during next quarter re completion of ticket office works and the second for completion of the athletics track improvements.

| Open issues  | Mitigation  |
|--|---|
| Covid-19 – Delays due to<br>measures and staff<br>redeployment | Work is continuing, albeit slightly delayed. No serious impact to the project delivery.   |
| Stakeholder engagement   | Critical to the success of any option appraisal or potential proposal.<br>The Wellesley is a well-loved asset within the borough with long<br>standing uses. Continue to work with stakeholders to develop options<br>for the site that will be well used and well managed. |

Delays to lighting improvements due to lack of responses from UK Power Networks. GYBC Property Team continue to push for response and for works to be completed.

Following the submission of the bid and the film, officers continued exploring the procurement options for the next stage. This included liaising with the procurement team at South Norfolk Council and developing an options appraisal for ELT to consider.

The comms strategy continued to be refreshed based on an assumption of a positive outcome.

Hosted a visit by preferred operating partnership including visit to the building where all partners formally met one another. Stakeholders and Commercial Operators have been kept updated on the progress of the application submission and when notification of award is expected.

Once outcome understood / known, officers completed a paper for Full Council to approve and sign off the grant offer letter / conditions to enable a complete acceptance of the funding as per NLHF requirements.

NLHF held a formal start-up meeting the 10<sup>th</sup> September to establish the project and indicate grant conditions. Permission to Start was then commenced with the return of key Council policies and documents supplied by the deadline of 6<sup>th</sup> October.

Procurement specifications prepared for launch mid-September incorporating a Business Planner, Governance Planner and Interpretation Planner. These tenders are live.

Procurement specifications for Architect and Structural Engineer has been drafted, ready for launch the start of October. All professional team appointments should be evaluated by December with intention to commence the development application from January 2022.

Business Rate Pool (BRP) Reporting is on track and claims are being drawn down following the completion of this stage 1 milestone. BRP claim awaiting approval.

| Open issues   | Mitigation  |
|---|---|
| Financial risk to Council managing project of this magnitude and national importance                                    | Assessment undertaken in Expression of Interest stage by<br>appointed QS to review capital costs, this was layered<br>with the revenue costs brought together by the Business<br>Planner and Heritage / Activity consultant. The budget<br>will again be refined and tested at development stage by<br>the appointed design team and overseen by a qualified<br>client-side project manager.              |
| Lack of understanding the depth of building<br>restoration requirements. Risk of structural and<br>application failure. | Investment in thorough and detailed design, engineering,<br>cost and business planning work in the pre-application<br>phase has enabled the Council to understand and<br>mitigate the risks presented by the project. As stated<br>above, the work for the development phase will shortly<br>be underway to refine the costs to RIBA 3 before<br>agreement to move to the final / full application stage. |
| Commercial Operator withdraws from project  | The business modelling from the operator point of view<br>has been completed. Liaison has continued following<br>positive outcome and a partnership discussion is due to<br>be completed in advance of the start-up meeting to<br>continue the development of the agreement in line with<br>the other preferred partners.   |
| Change in nature of operational partnership approach from original tender / scope                                       | Legal (NPLaw) have reviewed the procurement process<br>for the procurement of operator and have confirmed that<br>the process completed was to seek a concession<br>arrangement. Assuming this approach continues (and<br>there is every intention it will) then no further<br>procurement needs to take place for the commercial<br>operator.  |
| Securing the full partnership   | The bid makes clear the partnership agreements will be<br>developed and agreed throughout the development<br>phase. There is a budget to refine this further for each<br>partner including allowances for procurement.  |
| Project hold during Covid-19 measures   | Delays to the project programme are planned as minimal,<br>the full consultant team is now in place and the project<br>plan being adjusted to ensure workshops project delivery<br>is possible within NLHF deadlines.   |

Works on the six-day market progress well although delays due to materials and manufacturing have been encountered leading to a delay with phase 1 moves to January 2022. Traders locating have confirmed remaining units will be marketed during November.

A detailed feasibility study for the redevelopment of the former Palmers department store into a Library and learning hub has been completed. The study demonstrated that there is a need for the project and that it is financially feasible.

A series of internal workshops have been undertaken to explore the opportunities and constraints of site and develop a vision and set of objectives, which have been approved by the Officer Working Group. Optioneering is currently underway to develop two design concepts for the site

as a whole. Landscape and Highways design teams are working together with relevant stakeholders to respond to operational and maintenance requirements.

The wider public realm improvements will be co-ordinated with the six-day market, library redevelopment, county art trail, LCWIP and trees for cities projects. Comms strategy developed and agreed. Further stakeholder mapping ongoing along with development of consultation strategy. External stakeholder engagement underway.

|                               | Tourism Itineraries  | October 2021  |

The project has achieved the following objectives and activities in this quarter:

- Appraisal of overall project plan, mapping all outputs against deliverables
- Produced monthly trader newsletters
- Updating Tourism Itineraries, across partnership
- Delivery of market entertainments
- Delivery of trader support in liaison with Business Advisor
- Designed market model to generate further monthly markets across the Borough utilizing additional income generated by the project.
- Establish any new markets in the Borough
- Budget review completed with Finance Officer
- Completion of Claim 8 with FLC and certificates sent to Lead Partner to process next payment

Over the course of the next reporting period the project will be moving to complete its final approved activities to close delivery by the 31<sup>st</sup> December 2021. This includes receiving the sustainability plans from the lead partner, issuing a further cross-border press release, publication of the last set of tourism itineraries, promoting business support workshops and webinars to traders, encouraging traders to register their stall on the Go Trade website and seeking ways of continuing to invest in market tourism after the project completes.

| Open issues  | Mitigation  |
|--|---|
| Delayed payment of claims.   | GYBC officers continue to mitigate/seek advice from<br>the lead project partner and the Joint Secretariat to<br>resolve with FLC.   |
| Continued local and/or national lockdown due to coronavirus  | Further lockdowns prevent the delivery of<br>marketplace events. Officers will endeavour to plan<br>events complying with government guidelines and<br>concentrate activity on Trader support and tourism<br>promotion. |
| Inability to achieve agreed project targets through<br>lack of trader engagement or market<br>developments | Officers are documenting all engagement activity to<br>demonstrate ambition and attempts that should a<br>lack of engagement and missed targets result, we<br>can justify clearly via audit, determination to achieve   |

### **Financial Summary – Actuals**

| Budget   | Committed Spend | Savings Achieved | Income Achieved         |
|----------|-----------------|------------------|-------------------------|
| £317,024 | £216,774        | £52,447          | £186,326 in paid claims |

### Commentary:

The funding body Interreg has recently paid 100% intervention rate on the last three approved claims, as part of the project extension agreement. As a result 31% has been saved and can be reinvested into market activities which is being presented to Economic Development Committee separately in November.

The procurement for the Strategic Partner has progressed to 'round 2', the competitive dialogue phase, with the successful tenderers. Draft Proposals are due for submission by 29<sup>th</sup> October 2021 and will then be evaluated prior to call for final tender.

The application made to the Brownfield Land Release Fund for funding towards demolition and site remediation costs was unsuccessful.

Costed appraisal re extinguishment of long lease to northern part of the site provided by Property and Assets

Talks with Homes England in relation to funding are ongoing.

| Open issues          | Mitigation  |
|----------------------|---|
| Viability of site    | Procurement of a Strategic Partner and grant applications will address the viability of the scheme. |
| Resolution of leases | Ongoing discussions with current leaseholders.  |

Financial Summary – Actuals

| Budget  | Committed Spend | Savings Achieved | Income Achieved |
|---------|-----------------|------------------|-----------------|
| £98,750 | £91,252         | £                | £43,288         |

### Commentary:

In addition to the £98,750 budget, there is up to £98,750 Business Rates Pool Grant Funding (BRP) available on a 50% match spending agreement basis.

Of the £91k committed spend, 50% has been reclaimed from the BRP agreed grant funding (income achieved). This funding is due to expire in January 2022.

Open procurement for soft market testing issued via Delta on 21<sup>st</sup> June, closing date 26<sup>th</sup> July. No submissions received. OWG agreed to re issue slightly revised tender documents to target organisations: documents issued to seven organisations on 13<sup>th</sup> October, submission deadline 28<sup>th</sup> October with a view to award contract early November 2021. Contract drafted by NPLaw and included with the tender documents.

CPO process being reviewed with Counsel advice received, potential option for NQ site. Advice states that any highways land should remain as highways regardless of land ownership. NCC progressing the improved link between North Quay (road) and Vauxhall Bridge. OWG to agree next steps.

Wider site CPO options being explored. All landowners to be contacted with final formal offers, before the OWG decides on next steps. Previous offer made on Site 10 rejected by landowner.

Homes England have made North Quay a priority site and are working with PM to produce a brief for potential funding for production of a high level 'state of the market' evaluation.

### Summary of the whole project

Development of Great Yarmouth Operations and Maintenance Campus located on the southern tip of the South Denes peninsula and outer harbour – an optimum location for the offshore sector. The development will include new pontoons, improved highway infrastructure, new facilities for offshore energy sector businesses and refurbishment of the river quay.

The aims of the project are to:

- Encourage & support the growth of the offshore energy sector in Great Yarmouth
- Offer facilities in close proximity to Great Yarmouth's Outer Harbour, giving operators access to deep water as well as the river port
- Rejuvenating and redeveloping sites and quay infrastructure adjacent to the Outer Harbour
- Potentially creating up to 650 new jobs at the new campus

### Summary of Project Quarter Performance

Demolition/Asbestos Contract completed. New topographical survey undertaken on Marine Base site post-demolition and issued to construction tenderers as updated site information.

Tender documents and Detailed Design updated and completed. Tender documents package submitted to Tenderer: 6th August, tender return date deadline: 29th October 2021. Tenders received will be reviewed next quarter with a view to award contract early December 2021.

Communications plan has now been reviewed by NCC Comms and OWG at July meeting and will be implemented and updated as planned.

Planning application submitted 14<sup>th</sup> May, Development Control Committee scheduled for 10<sup>th</sup> November 2021.

WSP environment site surveys now completed. Awaiting results report.

Delays were experienced with Marine Management Organisation (MMO) progressing Licence for in-river site investigation. Application submitted 27th January 2021. Draft Licence received from MMO on 14th September; the Project Team have subsequently successfully challenged Licence conditions that were imposed.

NCC application to MMO for construction works licence was submitted on 14th May and application has been validated at MMO. Construction Licence application is presently 'on hold', awaiting resolution of Scoping Opinion between MMO and WSP. Due to timescales, a construction licence application was submitted before MMO determined Scoping Opinion. The Scoping Opinion has since been received from MMO, who had requested an updated Environmental Statement (ES). Meeting held early September between NCC/WSP project team and MMO. WSP now assessing implications on ES.

Further dialogue ongoing between WSP and Cadent Gas over design proposals and construction constraints relating to vibration with regards to safety of the Cadent Gas Main. Ground Investigation reports and Maritime tender design submitted to Cadent for review/assessment. Further load bearing calculations for storage area access/egress to be submitted to Cadent once finalised by WSP. Vibration analysis to be updated and submitted once in-river SI is carried out.

Engagement has commenced with utility service providers for new electricity sub-station, transformer and power supplies to the proposed recharging points on the berths for SOV and CTV vessels. Engagement has also commenced with utility service provider for new potable water supplies to the proposed berths for SOV and CTV vessels.

Engagement with potential occupiers is ongoing with a strategy/prospectus being created to ensure the facility is marketed appropriately. The facility was promoted at the Global Offshore Wind event at Excel in London (29-30 September) with further opportunities being identified.

It must be noted the number of planning applications determined has increased dramatically – not only are the number of formal planning applications higher in comparison to the same period ending in the previous quarter, but the Development Management team is now processing tree works applications (which are not reported), of which there have been 95 since Jan. 2021. The 24 months ending in Q2 last year provided 1034 applications (total); in contrast the 24 months ending in Q2 last year provided 1034 applications (total); in contrast the 24 months ending in Q2 this year have provided 1130 applications + 95 (non-reported) tree applications = 1,225 total (a 18% increase) in workload.

Commentary: Covid recovery continues to impact as cases reaching completion in this quarter that would have commenced during or prior to the pandemic. The service continues to deliver adaptations in a Covid safe way, which does add some delay in the process. In addition, the service has lost one contractor during the pandemic and the remaining contractors are extremely busy resulting which is resulting in longer lead in-times. Contractors are also reporting issues with the supply of building materials and components; and the cost of these has increased exponentially. A recent review of the Schedule of Rates has been completed and a cost increase applied to reflect the increased costs. The service is also seeking to procure additional contractor capacity.

Recent staff vacancies (Occupational Therapist and 2 x Technical Officers) will continue to impact on performance in the short term. The Technical Officer vacancies have been recruited to and the last successful candidate will start on 1st November.

OT resource continues to be a challenge with a current IHAT OT post being vacant since August 2021. A new Occupational Therapist will star on 1st December, and in the meantime some additional hours have been worked by the other P/T IHAT OT. There remain challenges in Locality with recruitment of OT staff. As a result of vacancies, the waiting list for assessment has increased to 46 cases. Work has been started by the Norfolk Strategic IHAT group looking at resources and how the customer journey can be improved across Norfolk.
